

Bukola Jimoh

Cloud & DevOps Engineer · UI/UX Background

[Email](#) · [Github](#) · [LinkedIn](#) · [Portfolio](#)

PROFILE

Cloud & DevOps Engineer with a specialized background in **UI/UX design** across fintech, Web3, and SaaS. I leverage **over 4 years of experience** in product design to engineer AWS, GCP and Azure infrastructures that prioritize security, observability, and developer experience. Expert in **Terraform** and **CI/CD automation**, with a proven ability to solve complex cross-cloud integration challenges using a systems-thinking approach. I bridge the gap between high-fidelity front-end experiences and robust, serverless back-end architectures, ensuring that cloud systems are not just high-performing, but also intuitively documented and accessible. Currently pursuing AWS Cloud Practitioner (CLF-C02).

TECHNICAL SKILLS

Cloud & AWS	AWS (S3, CloudFront, Lambda, API Gateway, SES, IAM, EC2, CloudWatch, SNS, ECR, ECS Fargate), GCP (Cloud Storage, OAuth 2.0), Azure (Foundations).
DevOps & IaC	Terraform (Remote State/Locking), GitHub Actions, Docker, Multi-environment Pipelines
Security	Origin Access Control (OAC), IAM Least-Privilege Policies, HTTPS Enforcement, Secrets Management.
Design	Figma, Framer, Prototyping, User Research, Design Systems, Wireframing, Accessibility, Gamification
Development	Python (Boto3), React, JavaScript, Git, Figma, Design Systems, Framer.

AWS CLOUD PROJECTS

Multi-Cloud Security Audit Bridge (AWS to GCP)

2026 | [AWS Lambda](#), [API Gateway](#), [GCP Storage](#), [Python](#), [REST API](#)

- Engineered a cross-cloud serverless pipeline to stream AWS audit logs to Google Cloud Storage.
- Bypassed SDK library constraints by implementing a custom REST API integration for GCP authentication.
- Secured communication via OAuth 2.0 token exchange and encrypted credential handling in AWS Secrets Manager.
- Enforced Principle of Least Privilege (PoLP) across both AWS and GCP to ensure data integrity.

Infrastructure as Code: Multi-Environment Stack

2026 | [Terraform](#), [Docker](#), [ECS Fargate](#), [AWS](#)

- Provisioned a full VPC stack including ECS Fargate, ALB, and RDS using modular Terraform HCL.
- Implemented S3 remote backend with DynamoDB state locking to manage global infrastructure safely.
- Utilized multi-stage Docker builds to reduce image size from 1.2GB to 45MB, optimizing deployment speed.
- Managed isolated environments (Dev, Staging, Prod) via Terraform workspaces with manual approval gates.

Global Content Delivery Network & CI/CD Pipeline

2026 | [CloudFront](#), [S3](#), [GitHub Actions](#), [OAC](#)

- Deployed a highly available static site using S3 and CloudFront with 97% cost reduction vs EC2.
- Configured Origin Access Control (OAC) to eliminate public bucket access and enforce HTTPS globally.
- Automated deployments with GitHub Actions, triggering builds and cache invalidations on every git push.

VOLUNTEERING

Cloud & Tech Mentor | [Found Africa Technology](#)

Jan 2026 – Present | Nigeria

- Mentor early-career professionals transitioning into cloud and tech roles through 1:1 sessions and group workshops
- Continuously upskilling via AWS and Google Cloud Learning Platform, applying learnings directly to mentoring content
- Deliver introductory AWS workshops covering S3, IAM, and cloud fundamentals to cohorts of 10–20 learners
- Review mentees' portfolios and GitHub projects; provide structured feedback on documentation and architecture

WORK EXPERIENCE

UI/UX Designer & Framer Developer | [Banks Studio](#)

2022 – 2025 | Remote | Contract

- Designed and developed end-to-end digital products for startups and SMEs across Web3, fintech, e-commerce, and SaaS
- Built production websites using Framer; maintained design systems in Figma, reduced handoff time by 40%
- Conducted usability testing and user interviews; translated findings into measurable UX improvements
- Collaborated with developers on component specs, interaction states, and accessibility compliance

UI/UX Designer | [Alps Finance](#)

2022 | Remote | Full-Time

- Designed full product experience for a Web3 SocialFi platform, from onboarding flows to gamified retention loops
- Ensured customer onboarding and retention through a gamified UX; built and maintained the Figma design system
- Reduced design-to-dev handoff time by 40% through structured component documentation

UI/UX Consultant | [Zesty Market](#)

2021 | Remote | Part-Time

- Designed UX for a metaverse ad-space marketplace, unified experience across platforms reduced drop-off rates by 17%
- Delivered high-fidelity prototypes, user research, and design system documentation within tight timelines

Direct Sales Executive | [United Bank for Africa \(UBA\)](#)

2019 - 2021 | Nigeria | Full-Time

- Exceeded all monthly KPIs: deposit mobilisation +225%, ATM card sales +65%, account openings +35%, channel onboarding +10%
- Managed customer relationships and onboarded clients onto UBA's digital banking platforms and channels

EDUCATION & CERTIFICATIONS

AWS Cloud Practitioner (CLF-C02) | *In Progress: Target June 2026*

Amazon Web Services

Foundations of User Experience (UX) Design | *Completed*

Coursera / Google

Designing Experiences for Augmented & Virtual Reality | *Completed*

Udemy

UI/UX Design | *Completed: 2021*

Professional Bootcamp

Bachelor of Agriculture (2:1, Hons) | *2018*

Obafemi Awolowo University, *Nigeria*
