

Bukola Jimoh

Cloud and DevOps Engineer · AWS · GCP · Azure · UI/UX Background · Remote, Open to Relocation

bukolaayodelejimoh@gmail.com · github.com/obooks29 · linkedin.com/in/bukolajimoh · d1zqsd6vsaz3bz.cloudfront.net

Profile

Cloud and DevOps Engineer with hands-on experience across AWS, Google Cloud, and Azure, with nine deployed projects including a live cross-cloud integration between AWS Lambda and Google Cloud Storage. Specialising in Infrastructure as Code with Terraform, CI/CD automation, and containerised deployments. Leveraging 4+ years of professional experience in fintech and Web3 to build user-centric, high-availability infrastructure. Design background means cleaner documentation, sharper architecture communication, and genuine care for developer experience at every layer of the stack. Currently pursuing AWS Cloud Practitioner (CLF-C02).

Technical Skills

Cloud Platforms	AWS (primary), Google Cloud Platform (GCP), Microsoft Azure
AWS Services	S3, CloudFront, Lambda, API Gateway, SES, IAM, EC2, CloudWatch, SNS, ECR, ECS Fargate, Secrets Manager
GCP Services	Cloud Storage, Cloud CDN, Cloud Build, IAM, Service Accounts, GCS REST API
Azure Services	Static Web Apps, Entra ID, RBAC, App Registrations, OIDC Federation, GitHub Actions CI
DevOps and IaC	Terraform, GitHub Actions, Docker, Multi-environment pipelines, S3 and DynamoDB remote state
Security	Origin Access Control, IAM least-privilege, HTTPS enforcement, OAuth 2.0 token exchange, OIDC
Design	Figma, Framer, Prototyping, User Research, Design Systems, Wireframing, Accessibility
Development	Python (boto3, requests), React, Vite, HTML, CSS, JavaScript, Bash, Git, Linux CLI
Monitoring	CloudWatch dashboards, SNS alerting, custom metrics, cost optimisation, incident response

Featured Cloud Projects

Three featured projects below. Full case studies for all nine deployments at d1zqsd6vsaz3bz.cloudfront.net

Multi-Cloud Security Audit Bridge [MULTI-CLOUD]

2026 · AWS us-east-1 + GCP us-central1

AWS Lambda · AWS Secrets Manager · GCS REST API · Python · OAuth 2.0 | github.com/obooks29/cross-cloud-bridge

- Built a serverless bridge that writes structured AWS audit logs to a Google Cloud Storage bucket in real time via the GCS REST API
- Implemented OAuth 2.0 token exchange using google.auth to avoid the heavy google-cloud-storage SDK, resolving Lambda layer size constraints
- GCP service account credentials stored in AWS Secrets Manager and retrieved at runtime: no hardcoded credentials anywhere in the pipeline
- Enforced least-privilege on both clouds: Lambda scoped to GetSecretValue only, GCP service account scoped to Storage Object Creator on one bucket

Infrastructure as Code [AWS]

2026 · AWS us-east-1

Terraform HCL · AWS S3 Backend · DynamoDB State Locking · GitHub Actions | github.com/obooks29/terraform-portfolio

- Reproduced entire AWS stack in Terraform HCL: S3, CloudFront, Lambda, API Gateway, IAM roles, and all supporting resources
- S3 remote backend with DynamoDB state locking ensures concurrent-safe operations across any number of engineers or pipelines
- Full lifecycle demonstrated: terraform apply provisions 14 resources in under 3 minutes; terraform destroy cleans up completely
- Every infrastructure change is reviewable as a pull request before it runs, the same workflow as application code

Multi-Environment CI/CD Pipeline **[AWS]**

2026 · AWS us-east-1

GitHub Actions · AWS S3 · CloudFront · Branch Protection · Manual Approval Gates | github.com/obooks29/portfolio

- Dev, Staging, and Production environments with isolated GitHub Actions workflows and separate deployment targets per environment
- Production deployments pause for manual approval: no code reaches users without a reviewer confirming the staging environment looks correct
- Branch protection rules enforce required status checks on main; full pipeline runs in 19 seconds from push to live
- Pattern mirrors what engineering teams at Stripe, Shopify, and similar companies run in production every day

Additional deployed projects: GCP Static Site with Cloud CDN and Cloud Build [GCP] · Azure Static Web App with OIDC and RBAC [AZURE] · Containerised ECS Fargate Deployment (26.89MB image) [AWS] · Observability Dashboard with live SNS alerting [AWS] · Serverless Contact Form API [AWS] · Automated Global Web Hosting with CloudFront OAC [AWS]

Community Contributions

Cloud Community Contributor · **Found Africa Technology**

Sept. 2025 - Present · Remote

Pan-African tech community supporting career transitions into cloud and engineering.

- Provisioned AWS infrastructure for Found Africa Technology including S3, CloudFront CDN, and GitHub Actions CI/CD, reducing deployment time from 45 minutes to under 2 minutes and cutting hosting costs by 94%
- Facilitate peer learning sessions for designers and non-technical professionals exploring cloud and DevOps careers
- Contribute introductory AWS content covering S3, IAM, and cloud concepts to cohorts of 10 to 20 learners per session
- Review community portfolios and GitHub projects; provide structured feedback on documentation and architecture decisions

Work Experience

UI/UX Designer and Framer Developer · **Banks Studio**

2022 - 2025 · Remote, Contract

- Designed and developed end-to-end digital products for startups and SMEs across Web3, fintech, e-commerce, and SaaS

- Built production websites using Framer; maintained design systems in Figma, reducing design-to-dev handoff time by 40%
- Conducted usability testing and user interviews; translated findings into measurable UX improvements
- Collaborated with developers on component specs, interaction states, and WCAG accessibility compliance

UI/UX Designer · Alps Finance

2022 · Remote, Full-Time

- Designed full product experience for a Web3 SocialFi platform from onboarding flows to gamified retention loops
- Built and maintained Figma design system; reduced handoff time by 40% through structured component documentation

UI/UX Consultant · Zesty Market

2021 - 2022 · Remote, Full-Time

- Designed UX for a metaverse ad-space marketplace; unified cross-platform experience reduced drop-off rates by 17%

Direct Sales Executive · United Bank for Africa (UBA)

2019 - 2021 · Nigeria, Full-Time

- Exceeded all monthly KPIs: deposit mobilisation +225%, ATM card sales +65%, account openings +35%, channel onboarding +10%

Education and Certifications

AWS Cloud Practitioner (CLF-C02) · Amazon Web Services

In Progress, Target June 2026

Foundations of User Experience (UX) Design · Coursera / Google

Completed

Designing Experiences for Augmented and Virtual Reality · Udemy

Completed

UI/UX Design · Professional Bootcamp

2021

Bachelor of Agriculture (2:1 Hons) · Obafemi Awolowo University

Completed
